Report to English Club event organizers.

The main aim of this report is to analyse reasons of students' attendance of school events and to try to find out how to increase the number of those who participate in these events.

Most of the students, roughly 90 percent, come to school events in the ~~search~~ ^{search} for enjoyable experience they can later share with their friends and relatives. About a half of those who took part in the research attend school events mainly because of their friends and family, either to support them or simply to spend time together. Nearly the same number of students look for educational experience as the main thing or just want to be involved in school activities. The lowest percentage of students attend these events mostly because such arrangements are popular and annual. Compared to the number of students who participate in school events to gain any kind of useful or enjoyable experience, the number of those who attend such meetings because they are simply a trend is very little. It is clear that the opportunity of spending time with family and friends and having fun affects the attendants the most. That is why I suggest to invite more members of students' families and friends of participants to satisfy the students' need in communication. Besides, I believe that it is worth making school events more attractive for students by adding some activities which are popular among young people to make their experience truly enjoyable. However, we shouldn't forget about the educational part as it is one of the main reasons of students' attendance as well.

250

To sum up everything, I think that finding a balance between fun and education in school events can increase students' participation in them.
