Half-city, half-amazing

Do you know where ^{annually} second most androids are produced per year? If you do not, you should definitely visit the city of Perm - "the Pearl of the Ural mountains".

• The connection

Due to the fact that Perm was established just a couple hundred kilometres east of the Urals, ^{city} Perm always served as a kind of ^{bridge} ~~route~~, connecting European and Asian parts of Russia. Perm prospered with Russia and ^{had} ~~was~~ already become an extremely important link in both transport and economic ~~chains~~ systems of Russia. Communication with other countries is arranged perfectly, through both ^{land} and air. Many companies also have their departments in Perm, so there always are new job opportunities.

• Home ex machina

The streets of our city are constantly busy and noisy throughout the day. However, you can rarely meet a man there. How is it possible? The matter is that there are approximately 0,9 androids per human in the city. Nonetheless, androids are extremely convenient and reliable. They can cater for all of your needs with the help of special software, which is integrated into the systems of banks and shops. Androids could even drive a vehicle, such as a car, if you let them do it!

• Sightseeing

I could go on talking about sightseeing in Perm for hours, but in my view, there's no better way of ^{experiencing something} ~~seeing~~ ~~it~~ on your own. Visit our food market with hundreds of cuisines, roller skate in our skatepark, visit the android factory - do literally anything you would like to do.

Goodbye and see you in Perm!
